

Mazzstock – Emergency Services / Site Plan Discussion

April 7th, 2016

This letter signifies that Mazzstock and its representatives have discussed at length ingress and egress plans for police and fire vehicles entering the premises in the case of an emergency during hours in which the gate is open. The approved site plan has been reviewed by all parties, and no exceptions are taken in employing the following strategy: Mazzstock will provide flaggers on duty at two locations between the entrance of the property and the main gate to assist in clearing traffic for entrance of emergency vehicles. Mazzstock will also maintain two way traffic during the course of the event employing this same system.
