

In accordance with Appendix B of the SWPPP Design Manual, the project qualifies (less than 5 acres of residential disturbance in a regulated MSA, the Town of Marlborough) to require only preparation of an Erosion and Sediment Control Plan as the SWPPP.

Silt fence, properly installed, will be utilized to control any sediments from construction to enter the live stream in the rear of the lot. A detail with installation instructions is on Sheet 3 of the plans.

A temporary construction entrance is to be put in Place as per the detail. A NYSDOT Highway Work Permit is required for the final drive entrance.

Other standard notes regarding erosion control are listed on Page 3 of the Plans.
